## About Iris Solutions Incorporated (ISI)

ISI provides automated software and systems integration solutions to clientele with Biotech, Medical, Scientific, and Industrial applications. Since our inception in the year 2000, we have been providing solutions to customer's integration needs. Our clients utilize our unique expertise to attain exceptional results.

Through the years, we have successfully integrated advanced systems in the following disciplines:

- **Advanced Machine Vision Systems**
- **Motion Control Systems**
- **Test Systems**
- **Measurement Systems**
- **Data Acquisition**
- **Data Analysis**

The development of these systems requires experience that encompasses multiple disciplines, and an understanding of the client's business, industry and scientific needs. ISI meets this challenge by working closely with our customers to combine our experience with theirs, and in turn developing a team atmosphere that is pivotal to success. Some examples of systems that ISI has helped to develop and improve in this "Team Atmosphere" include the following:

- **Vestibular Testing and Eye Monitoring Systems**
- **High Speed Inspection Systems**
- **Image Analysis**
- **Automated Microscope Motion Control & Image Acquisition**
- **Testing of Fiber Optic Amplifiers**
- **Laboratory Control and Testing Systems**

## Clients

Our clients are our "life blood" and we treat each as a future reference to our work. Some of our recent clients include:

- **Alcoa**
- **Neuro Kinetics Incorporated**
- **Clorox**
- **Corning**
- **Respironics**
- **Alcon**
- **Graftek Imaging**
- **Versa-Matic**

We are also a National Instruments Alliance Member. This allows us to work closely with National Instruments as an integrator/consultant to provide clients with seminars and integration services.

## Services Provided

ISI provides consulting and integration services. These services encompass the full development cycle of automation and test systems:

- **Software Development**
- **System Integration**
- **Project Evaluation**
- **Specification Development**
- **Proposal Review**
- **Design Review**
- **Project Management**
- **Turnkey Development**

Feel free to contact ISI about your development needs. We will gladly review your system requirements with you.
